Skills

Professional Experience

Experienced Cloud Engineer and Linux Systems Administrator with a strong foundation in open-source software, virtualization, and automation. Specialized in designing, deploying, and maintaining scalable cloud-based solutions using platforms such as Google Cloud Platform (GCP) and Amazon Web Services (AWS). Proficient in infrastructure-as-code (IaC) tools like Terraform, containerization with Docker and Orchestration with Kubernetes, and scripting for process automation. Passionate about leveraging cloud technologies to optimize system performance, security, and cost-efficiency. Critical thinking, decision making and problem solving skills.

Linux, Bash, Kvm, Docker, Kubernetes, Terraform, SQL, Python, Git, Google Cloud Platform (GCP), Amazon Web Services (AWS)

Etixen / Cloud Engineer and Technical Lead for Google Workspace

Nov 2021 - Present

- Cloud Project Management: Oversaw the planning, execution, and monitoring of projects on Google Cloud Platform (GCP), including service configuration, infrastructure migrations, and resource optimization.
- Developer Support: Collaborated closely with development teams to offer technical guidance on solution architecture, DevOps practices, and application deployment in cloud environments.
- Repository Administration: Managed and maintained code repositories, ensuring efficient version control practices and facilitating continuous integrations.
- Linux and Network Consulting: Provided specialized advice on Linux server administration and network design, ensuring secure and scalable infrastructures.
- Technical Leadership: Led the Google Workspace technical support team, providing strategic direction and ensuring the successful implementation of cloud-based collaboration solutions.

Queen's FSC SRL / Technical Support

May 2010 - Oct 2021 (11 year 6 months)

For over 10 years, I provided technical support (hardware and software) and developed small software projects, such as an accounting system, for a real estate accounting company located in Cordoba, Argentina. I utilized technology as Django, Debian, Apache, MySQL, and PHP. It was a wonderful experience supporting the company's technical needs and contributing to their success.

Education

National University of Córdoba
University Analyst in Computer Systems

2024 - Present, Córdoba, Argentina

Lenguage

Spanish (native)

English (Fluent)

Repository

This is my repository: https://gitlab.com/estebanmol

Certifications

Google Cloud - Associate Cloud Engineer

Conference and Talks

Talk at the Google offices: Defining a safe ecosystem under best practices.

2023 - CABA, Argentina

Coffee and Chat with Coderhouse: Escape from hackers

2023 - Argentina

Latin American Free Software Installation Festival:
Hacking Windows Challenging the Security of Windows 7

2024 - CORDOBA, Argentina

Hobbies

- Research on new free and open source technologies.
- I write in my blog about tutorials of open source technologies
